

Poco x3 pro root

Continue

Hey guys, another update from our team. Today we will list all of the currently available custom ROMs for Poco X3 Pro (vayu). This list will be of interest to those who are going to buy this model of smartphone, or already the happy owner. Seems like there is a lot of firmware has already been released and our today's list turned out to be quite big and impressive. I believe we have here more than 10 completely different ROMs here. Share your experience with flashing the Custom ROMs and other unofficial firmware on your Poco X3 smartphones. Download Custom ROMs for Poco X3 Pro Please remember, you take all the responsibility for the possible issues. Make sure you completely understand what you're doing. Take care! If you're not sure what to do and how to flash different firmware, we strongly suggest you to NusantaraProject | Official Release Android 12 | Github The firmware built is based on AOSP.Google services are not built in(download supported NikGapps from sourceforge)Clean firmware is required before install.SafetyNet might not pass, we should wait for the fix.Stock firmware version 12.0.x is recommended before install.After the first flash the data partition is decrypted automatically. Download link AncientOS | Official Release Android 12 | Github Beta build.Based on OSS.Required firmware 12.0.X.X version.SELinux: Enforcing.Passes SafetyNet successfully. Download link ArrowOS 12.0 | Official Release Android 12 | Author: Kubersharma001 ArrowOS is an AOSP / CAF based project which was started with the goal of making things simple, clean and neat. Download ROM | Download Firmware | Download Recovery How to install ArrowOS 12.0 on Poco X3 Pro First of all remove your fingerprint, PIN code and screen password on MIUI (in case you've used these previously).Unlock the bootloader.Copy downloaded ROM archive to phone internal memory (on microSD).Flash the right recovery: OrangeFox or TWRP from Nebrassy 3.5.2-11.Firmware MIUI 12.5.2.0 is required.Flash the downloaded ROM .zip archive.Flash Magisk in case you need root.Now go to "Wipe" > "Format Data" > "Yes".Reboot, wait until the system starts and enjoy the working ROM. How to update ArrowOS 12.0 to newer version.Download and use OTA updater and it will update automatically.Download the update manually and flash it via TWRP. BiancaProject 2.0 | Official Release | Github Android 12 Beta build.Based on OSS.GApps is included.SELinux: Permissive.Passes SafetyNet successfully. Required magisk to pass. Download ROM DerpFest | Official Release Android 12 BETA buildBased on OSSGoogle services are built inRecommended firmware: 12.0.X.XSELinux: PassedSafety can be fixed with this module: NFC does not work: safenet-fix-v2.1.1.zip Download ROM Project Elixir OFFICIAL v1.0 | Official Release | Github Android 12 Note before install Project Elixir on Poco X3 Pro It's recommended to wipe your phone before flashing this ROM and avoid using the Titanium Backup or any other restore app, because it's might cause lots of different issues.
